Subject: RE: BP Whiting update

BP update for this morning (3/29):

Shoreline SCAT assessment suspend today (3/29) due to inclement weather causing dangerous water conditions. SCAT activities are expected to resume tomorrow (3/30). Bev Kush and Verneta Simon will be returning to site tomorrow to assist SCAT.

Last night (3/28, approximately 6pm) the #1 boom (secondary containment boom), broke away from its moorings due to water conditions. BP recovered the boom when it washed to shore, and are documenting any oil contamination on the boom. Water conditions have not allowed the boom to be re-attached. A boom remains around the outfall.

BP continues to vac out the #6 separator and flush the line to the separator.

A written request has been made to BP for daily updates on totals collected.

No planned media or congressional briefings for EPA.

Mike Belsow, Cisco, and 1 START contractor on-scene (3/29). USCG on scene as well.
